Mr. Gao (in the company of his mother - who can't speak English) reported as directed. He states he received his medical injection from the Forensic Clinic nurse on Jan 14, 1994. He appeared restless, wanted to telephone a New Jersey University twice within 15 minutes. re: their response to his seeking employment. He states that when he has completed his court dates in February, 1994 he intends to move to the U.S.A. to seek University employment. I advised him that he would have to seek permission from the court to leave the Province and also obtain a working permit from U.S. Immigration.
